

Job Alerts & Company Research Report

Deliverable 6: LinkedIn Optimization, Target Company Research & Job Search Enhancement

Deliverable 6 Submission

Objective: Set up active job alerts for target roles, conduct comprehensive LinkedIn company research, and reflect on how these features accelerate the professional job search.

1. Job Alerts Setup

Target Position Alerts Configured on LinkedIn

- **Alert 1:** Data Analyst (Remote / Hybrid) – Daily notification frequency for entry-to-mid level analytics roles.
- **Alert 2:** Prompt Engineer (Work From Home) – Instant notification frequency for emerging AI engineering positions.
- **Alert 3:** Business Intelligence Analyst – Weekly digest for dashboard development and SQL/Python reporting roles.

3. Reflection: Enhancing the Job Search with LinkedIn Features

Strategic Advantages & Career Growth

- **Proactive Discovery:** Automated job alerts eliminate manual searching, ensuring immediate visibility into newly posted relevant opportunities.
- **Targeted Preparation:** Deep company research on LinkedIn provides crucial insights into organizational culture and recent projects, enabling tailored interview responses and high-impact networking.
