

Deliverable 2: Profile Submission & Future Vision Board

Name: Ankita Mukund Panpatil

Deliverable: Deliverable 2 – LinkedIn Profile Submission & Professional Vision Board

1. LinkedIn Profile Submission & Reflection

Profile Link: [linkedin.com/in/ankita-panpatil](https://www.linkedin.com/in/ankita-panpatil)

Reflection on Changes Made:

During this module, I overhauled my LinkedIn profile to align more directly with my expertise in data analytics, Python programming libraries (Pandas, NumPy, SciPy, StatsModels), database design (MySQL), and business intelligence (Power BI DAX measures). Specifically, I refined my professional headline to highlight my technical skill set, restructured my experience summary to emphasize analytical project outcomes, and cleaned up my featured section to showcase structured dashboards and research initiatives.

Expected Professional Impact:

These updates significantly enhance my professional discoverability for roles in data analytics and software engineering. By presenting a cohesive, polished, and skills-focused digital presence, recruiters and industry peers can immediately grasp my core competencies, resulting in higher engagement and quality networking opportunities.

2. Future Vision Board

My professional vision board outlines the strategic connections, technical skills, and career milestones I aim to accomplish moving forward:

Vision Category	Specific Goals & Targets
Target Connections	Connect with senior Data Scientists, Lead BI Analysts, IoT Research Engineers, and AI Ethics specialists to expand industry mentorship and collaborative networks.
Skills to Acquire	Advanced machine learning deployment, cloud data pipelines (AWS/Azure), deep learning frameworks, and advanced dashboard UI/UX design.
Career Milestones	Successfully complete Ph.D. research application at Amity University, transition into a high-impact Data Analytics/Engineering role, and publish peer-reviewed technical insights.
